

## REAR WING SPOILERS

### FOR NOTCHBACK VEHICLES

KAMEI rear wing spoilers greatly enhance aerodynamic features of your car. The spoiler marks the edge of the boot thus making parking much easier, and the integrated brake light greatly improves safety.

KAMEI's universal rear wings, with or without additional brake lights, fit an extensive range of vehicles. The spoilers are made from light ABS plastic and are simply to paint.

The fitting of a rear spoiler is very easy. For most models only an additional adapter kit is required; the relevant kit is listed in the attached chart. If a adapter kit is required, please order it together with the spoiler.
