

Case Study | Mercedes-Benz Original Roof Boxes

Stuttgart, March 2004. In order to make its high quality Original Accessories really stand out, Mercedes-Benz Accessory GmbH. has decided to offer its customers roof boxes in the inimitable design of the Mercedes-Benz brand. The choice for the manufacturer of the boxes is the quality leader, KAMEI, and after a development phase of six months, the new Mercedes-Benz roof boxes in three sizes have arrived to the worldwide dealerships of the German luxury car maker.

KAMEI Performance

- Development of an unmistakable design for the Mercedes-Benz roof boxes (in close consultation with Mercedes Design)
- Production of multilingual installation instructions
- Toolmaking
- Manufacturing (incl. production, packaging, shipping)
- Exact reproduction of the Mercedes-Benz colour tone "calcite white" in DUROKAM material for a Special Edition Roof Box

The Advantages for Mercedes-Benz

- Unique position in the roof box market thanks to the unmistakable Mercedes-Benz design
- Excellent cost efficiency due to the use of existing, proven KAMEI roof box components (e.g. tool costs only applied for the lid)
- KAMEI's decades of experience in the manufacturing of high quality "Made in Germany" auto accessories.
