The Oyster is more than just a pretty face, its functionality is pretty impressive too. With its dynamic lines, this designer box is anything but subtle, but still merges seamlessly with your vehicle to create a single visual unit. As well as its innovative design, the Oyster also boasts high-quality features such as the ClickFix mounting system and DuoLift system that allows it to be opened and closed from either side. Functionality, practicality and safety have never looked so good.

**Dimensions (L x W x H):**
- Max. outside: 206 x 95 x 36 cm
- Max. inside: 194 x 85 x 30 cm

**Volume:** 450 litres

**Net weight:** 21 kg

**ROOF BOXES**
The distinctive one.

The new generation of roof boxes has arrived: with the Fosco 540, we are presenting a model which is unique in terms of shape, functionality and safety. The design picks up on current trends in the automotive industry. Particularly striking is the rising line dividing the upper and lower parts which, just like the shape of many cars, rises towards the back. The Fosco line also set new standards in terms of functionality – for example with better protection of roof box lids and bases. The locking system also guarantees optimal protection against theft. The Fosco models are mounted using ClickFix, the world’s fastest roof box mounting system.

CORVARA S
The elegant one.

Long journeys become a much more attractive option with the Corvara S series roof boxes. Inspired by modern automotive design, these two models are both impressively spacious and incredibly quick and easy to install. This is because they feature the innovative ClickFix system, currently the world’s fastest roof box mounting system. The Corvara S roof boxes are also fitted with the DuoLift opening system, which allows the box to be opened easily from either side. The central locking system with safety lock mechanism provides maximum protection for the cargo inside.

**CORVARA S 390**

KAMEI 330/510
The convenient one.

The KAMEI 330/510 roof box is designed to make car journeys as convenient as possible. With a wide range of functional features and a spacious interior, it offers completely new levels of space for tough trips with lots of equipment. Its simple mounting system and – on the KAMEI 510 – double-sided DuoLift opening mechanism make every journey even more comfortable and safer.

**Auto Express Best Buy 2016**
HUSKY
The entry level one.

Robust, reliable, easy to attach, a dynamic design, sporty matte black – our ‘Husky’ entry level box has everything that sets all KAMEI products apart. The Husky is the least expensive roof box in the KAMEI range. But that doesn’t mean it compromises on quality and safety, which is why it still comes with our six year guarantee. The Husky has everything you need from a roof box: comfort sliding fitting system for simple installation, double lock system and – on the Husky XXL – central locking to protect against theft.

USING INSTRUCTIONS
For safety driving and right loading.

If possible, place the heavy objects in the middle of your KAMEI roof box, so that the overall payload will be distributed evenly over the loadbearing rack and the car. All packed articles must be securely tied down to prevent slipping. For sports equipment, use only specially designed carrying systems. It is important to ensure that the load does not present any obstruction to closing the KAMEI roof box, in order to prevent malfunction of the locking system. Never exceed the maximum roof load specified by the manufacturer. The maximum overall weight ("gross vehicle weight") of your vehicle must not be exceeded.

Your KAMEI roof box provides all the extra stowage space you desire - but it also demands that you adapt your driving style to the modified weight and height of your vehicle: Sensitivity to side winds will be increased, when loaded, the change in the centre of gravity of your vehicle will require you to modify your cornering and braking habits. Depending on the roof rack, the height of the vehicle will be increased by up to 60 cm. This must always be remembered when approaching low bridges or low entrance barriers (e.g. car parks). For the driving with a roof box KAMEI recommends a top speed of 130 km/h.
ROOF RACKS
A stable foundation.

Our aluminium rack system is the perfect addition to any vehicle with roof rails and a roof box. The cross-bars come in a number of different lengths, meaning that the rack system can be used with a wide range of vehicle models. And if you have a KAMEI roof box with the innovative ClickFix mounting system, it becomes even easier. You can mount the box right onto the rack without any additional accessories.

**Load bars type 1**
- 2 pieces, made of aluminium
- Max. Load: 100 kg
- Load bar dimensions (L x W): 1050 x 68 mm

**Load bars type 2**
- 2 pieces, made of aluminium
- Max. Load: 100 kg
- Load bar dimensions (L x W): 1150 x 68 mm

**Load bars type 3**
- 2 pieces, made of aluminium
- Max. Load: 100 kg
- Load bar dimensions (L x W): 1250 x 68 mm

**Load bars type 4**
- 2 pieces, made of aluminium
- Max. Load: 100 kg
- Load bar dimensions (L x W): 1350 x 68 mm

**Roof rail foot set**
- 4 pieces, lockable
- Max. Load: 100 kg
- For aluminium carrier systems with load bar types 1-4

*Important: in the case of roof box attachments with sliding adapters, two special rubber cover sections ensure especially fast, convenient mounting on the aluminium carrier. Here the rubber cover sections do not have to be adjusted specially or cut to size as is customary with other carrier systems.*

In the case of roof boxes without ClickFix fitting systems, sliding adapters or U-Bolts may be needed for attachment to the carrier system. The width of groove for adapters amounts 21 mm.

Please consult our vehicle type list for the respective compatibility of the individual carrier systems.
WORLD OF KAMEI

AUTOMOTIVE ACCESSORIES
Practical down to the smallest detail.

The KAMEI accessory range covers both practical as well as tailored retrofitting solutions for the interior and exterior of many vehicle models. Among others, in the form of:

• Loading sill protection made of high quality >ABS< aluminium brushed design and stainless steel
• Universal and made-to-measure loading sill protection foils in anthracite, transparent and black-matt
• Stoplock steering wheel lock for cars and oldtimer with more over 10,000 lock combinations
• Centre armrests for retrofitting, in either black leather look or fabric

In addition to extensive accessory options for the interior and exterior, we also provide retrofitting solutions especially developed for commercial vehicles and motorcycle quads. Among others, in the form of:

• Storage boxes for flatbed trucks or twin cabins made of >UP-GF<, >ABS< with up to 150 l loading volume
• Transport and pick-up boxes made of plastic bodies with high mechanical resistance and a maximum holding capacity up to 1150 l load volume
• Quad and ATV boxes for front or rear attachment on the tube roof rack
