# ROOF BOXES

## OYSTER

The dynamic one.

## ROOF BOXES

The Oyster is more than just a pretty face, its functionality is pretty impressive too. With its dynamic lines, this designer box is anything but subtle, but still merges seamlessly with your vehicle to create a single visual unit. As well as its innovative design, the Oyster also boasts high-quality features such as the ClickFix mounting system and DuoLift system that allows it to be opened and closed from either side. Functionality, practicality and safety have never looked so good.

OYSTER 450

# FOSCO

The distinctive one.

With the Fosco roof box, we present a unique model in terms of form, function and safety. The design picks up on current trends from the automotive industry: Particularly distinctive is the ascending parting line of the upper and lower parts, which rises towards the rear in analogy to the shape of many car models. The not only practical central locking system with security lock also provides optimum theft protection. The roof box Fosco is mounted using ClickFix, the world's fastest roof box mounting system.

The Fosco 420 is rather long at 195cm, but at 40cm it is slightly less wide than the other boxes. This results in a capacity of 420 liters, but is still compact.

**6 YEARS WARRANTY**

The Fosco 540 is the ideal companion for your (winter) vacation. With its dimensions fit four to six pairs of skis in the roof box. Super practical, especially with large, wide boxes is the DuoLift system, which makes it possible to open from both sides. So you always have quick access to your luggage, no matter from which side you approach the car.

# HUSKY

The entry level one.

The Husky entry-level roof box impresses with its modern design and is at the same time robust, reliable and easy to install. Thus, it offers all the features that distinguish the products of KAMEI. No cuts are made in terms of quality and safety either. That's why we also offer a 6-year warranty on materials and manufacturing\* for all versions of the Husky roof box.

The Husky roof box is now available in four different versions.

The smallest version of our Husky roof boxes is the Husky 300, which makes efficient use of space despite its smaller capacity of 300 liters. It is available with the opening from the right as well as the opening from the left.

# HUSKY

The entry level one.

The Husky 420 is the latest model from the house of KAMEI and was specially developed as a companion for your summer (vacation). It is the shortest roof box in our range and thus offers unrestricted access to the trunk. The practical DuoLift system allows you to open it from both sides. Summer utensils such as wake-boards, standup paddles and even strollers up to 155cm in length can be stored in the Husky 420 roof box. The practical dimensions also make it perfect for everyday use to expand the trunk volume.

## USING INSTRUCTIONS

For safety driving and right loading.

## ROOF BOXES

If possible, place the heavy objects in the middle of your KAMEI roof box, so that the overall payload will be distributed evenly over the loadbearing rack and the car. All packed articles must be securely tied down to prevent slipping. For sports equipment, use only specially designed carrying systems. It is important to ensure that the load does not present any obstruction to closing the KAMEI roof box, in order to prevent malfunction of the locking system. Never exceed the maximum roof load specified by the manufacturer. The maximum overall weight („gross vehicle weight“) of your vehicle must not be exceeded.

Your KAMEI roof box provides all the extra stowage space you desire - but it also demands that you adapt your driving style to the modified weight and height of your vehicle: Sensitivity to side winds will be increased, when loaded, the change in the centre of gravity of your vehicle will require you to modify your cornering and braking habits. Depending on the roof rack, the height of the vehicle will be increased by up to 60 cm. This must always be remembered when approaching low bridges or low entrance barriers (e.g. car parks). For the driving with a roof box KAMEI recommends a top speed of 130 km/h.

# ROOF RACKS

## FIXRACK

A stable foundation.

## ROOF RACKS

For vehicle models with roof rails, the KAMEI aluminum carrier system FixRack is the perfect base for your roof box. Due to the different length dimensions of the carrier bars, the carrier system can be easily combined with numerous vehicle models. If you also have a KAMEI roof box with the innovative ClickFix mounting system, the whole thing becomes even easier: you can mount the box directly on the carrier without any further accessories.

Two special rubber cover profiles provide the roof box attachment with sliding adapter for a particularly fast and convenient installation on the aluminum carrier. Unlike other carrier systems, the rubber cover profiles do not have to be specially adapted or cut to size.

Important: in the case of roof boxes without ClickFix fitting systems, sliding adapters or U-Bolts may be needed for attachment to the carrier system. The width of groove for adapters amounts 21 mm.

The roof rack foot is designed to be used for both freestanding and integrated roof rails.

For more information about our roof rack system, please visit:

[www.kamei.de/en/products/transport/roof-racks](http://www.kamei.de/en/products/transport/roof-racks)

Here you can also quickly and easily check the respective compatibility of the individual carrier systems to your vehicle on the current vehicle type list.

Roof racks

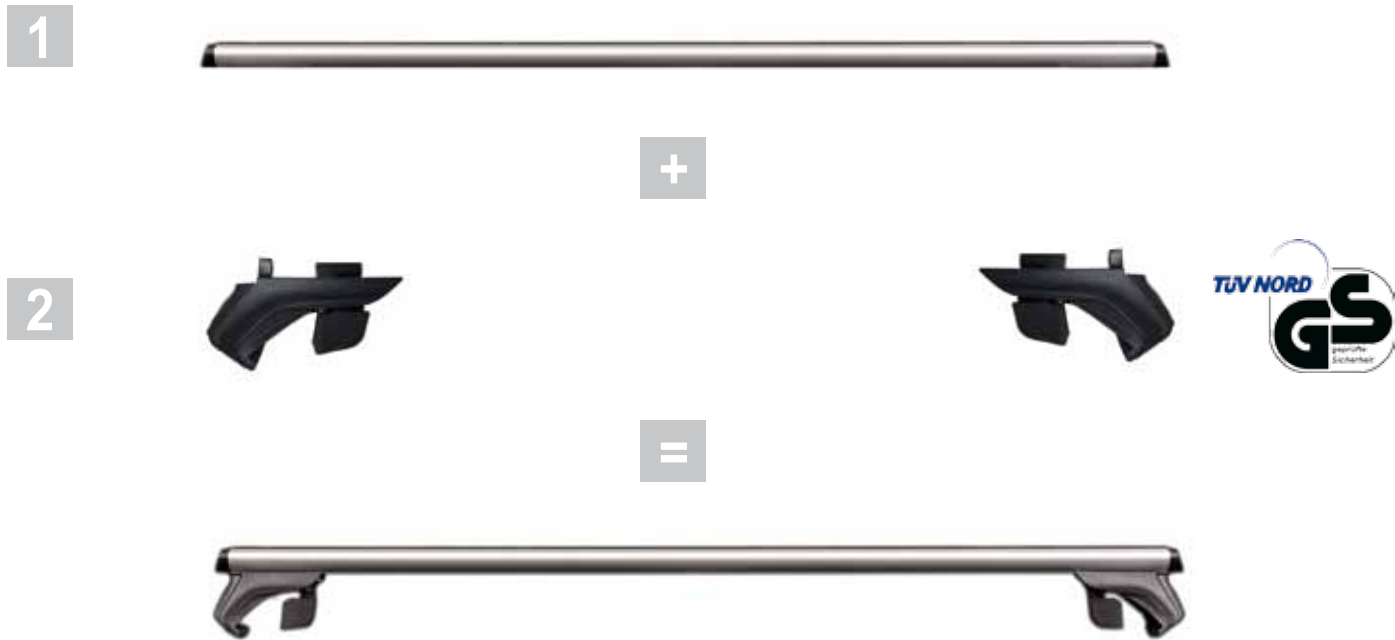

# FIXRACK

The roof rack system.

The roof rack system FixRack combines functionality and comfort. But how does FixRack work? It's very simple: Using the vehicle type list on our website or through your dealer, you pick out the right carrier bar **1** for your vehicle. Then you combine this with the corresponding roof rail foot set **2** and you are ready to mount the KAMEI roof box of your choice!

Quad- and ATV boxes for the front or rearmounting on the tubular carrier

Transport and pick-up boxes made of mechanically highly resilient plastic bodies

# AUTOMOTIVE ACCESSORIES

Practical in every detail.

The KAMEI accessories program includes both practical and precisely customized retrofit solutions for the interior and exterior of many vehicle models.

In the exterior area we offer products for more individuality and design. With protective films and a load sill protector, you can give your car the finishing touch while protecting it from damage during loading and unloading.

Center armrests, anti-slip mats and steering wheel locks combine functionality and comfort in the interior of your car and protect it from theft.

On our website at: [www.kamei.de/en/products](http://www.kamei.de/en/products) you will find all the information about our products and can check compatibility with your vehicle.

## KAMEI PARTNERS

solve your space problems.

KAMEI INDIVIDUAL

Are you interested in our products? Our dealers and importers near you are happy to help you with your „space problems“ and other requests.

On our website you will find both: local dealers and importers worldwide.

### KAMEI dealer

Your local contact.

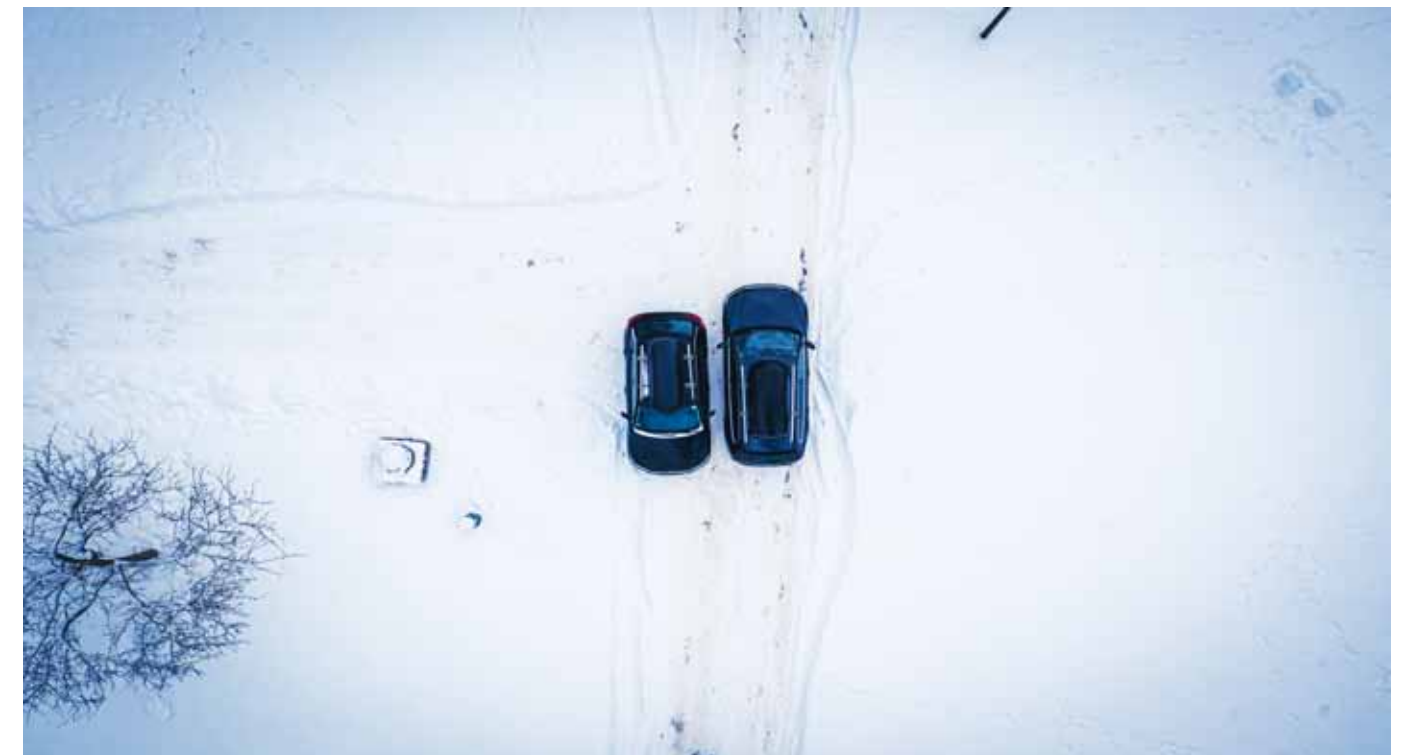

KAMEI products are available from dealers all over Germany. If you're interested in purchasing one, you can find the addresses of your nearest dealers using the searchingtool on our website. Certified KAMEI dealers are displayed first regardless of distance.

Please note that not every dealer will have every KAMEI product in stock at all times. We recommend contacting them by phone before travelling so as to avoid disappointment.

Please visit us at: [www.kamei.de/en/dealer-search/](http://www.kamei.de/en/dealer-search/)

Dealer search

### KAMEI importers

available for you worldwide.

KAMEI products can be found all over the world. Through our importers, we ensure that the majority of KAMEI products are sold on almost every continent.

Check our website for an importer near you at:
